## SKILLS

|                         |                                                                  |
|-------------------------|------------------------------------------------------------------|
| <b>Languages:</b>       | Python, C++, Java, JavaScript, SQL, HTML, CSS                    |
| <b>Tools/Platforms:</b> | Numpy, Pandas, Scikit-learn, XG Boost, Matplotlib, Random Forest |
| <b>Core CS:</b>         | Data Structures & Algorithms, Operating Systems, OOPs            |
| <b>Soft Skills:</b>     | Problem-Solving, Team player, Team Leader, Adaptability          |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                   |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>EarlyEdge   <a href="#">Live</a></b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Nov '25 - Present |
| <ul style="list-style-type: none"><li>Creating a job portal using HTML, CSS, JavaScript and Firebase database featuring "Time-Locked" job access for verified talent to reduce resume volume and prioritize merit.</li><li>Integrating Web Speech API to create an automated technical interviewer that provides real-time voice-based assessments and performance analytics.</li><li>Developing a real-time collaborative feature allowing students to form multidisciplinary "Squads" and apply for roles as a synchronized team.</li><li><b>Tech Stack:</b> HTML, CSS, JavaScript, Firebase Backend, Quiz API, Gemini API</li></ul>                   |                   |
