

ANUBHAV KUMAR

Aspiring Computer Science Engineer

☎ +91-7482956555 ✉ anubhavkr0407@gmail.com 🌐 [anubhav04](https://www.linkedin.com/in/anubhav04) 📍 Jalandhar, India

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python
- **Frontend Development:** HTML, CSS
- **Core CS:** Data Structures & Algorithms, OOP
- **ML/Data Tools:** NumPy, Pandas, scikit-learn, XGBoost, Matplotlib, Random Forest, K-Means
- **Other:** Cloud Computing (basics), NLP, AI concepts
- **Course Work:** Artificial Intelligence, Machine Learning, Operating Systems, Programming

ACHIEVEMENTS

- Leading student tech initiatives and managing hackathons & bootcamps.
- **Hackathon Finalist** – ML Innovation Prototype (2024)
- **2nd Runner Up** (Team) – 24-hour Hackathon (2024)
- Runner-up – Inter-school Badminton & Kho-Kho competitions

PROJECTS:

Renewable Energy Predictor:

- Built a **Random Forest forecasting model** achieving **85%+ R²** for predicting solar energy output using key features like temperature, irradiance, and weather parameters.
- Performed **feature engineering and hyperparameter tuning** to optimize model accuracy and reliability.
- Deployed the solution through an **interactive Streamlit dashboard**, enabling real-time user inputs, predictions, and data visualizations.

Process Scheduler Simulator:

- Developed a **Python CPU Scheduling Simulator** implementing FCFS, SJF (preemptive & non-preemptive), Priority, and Round Robin algorithms with automated calculation of waiting time, turnaround time, and throughput.
- Added **Gantt chart visualizations** to clearly demonstrate performance differences and trade-offs across scheduling techniques.

AI Chatbot Moderator:

- Built an **NLP-powered moderation chatbot** using regex-based text filtering to detect and block offensive, abusive, and spam content in real time.
- Simulated **group chat interactions in Python**, demonstrating safe conversation flow and effective rule-based content moderation.

News Aggregator:

- Built a **responsive static news reader UI** using HTML/CSS with a clean, structured layout for headlines, summaries, and links, later enhanced with **live news integration via a public API**.
- Developed the project as a **prototype for dynamic news platforms**, showcasing scalable UI design and real-time content rendering.

TRAINING & CERTIFICATIONS:

- Machine Learning – Summer Training
- Cloud Computing (AWS) – NPTEL
- Python: Basic to Advance – Udemy
- Dynamic Communication Skill for Career Success – LPU

EDUCATION

Lovely Professional University

Bachelor of Technology in Computer Science and Engineering – CGPA: 7.37/10

Aug-2023 – Present

Jalandhar
